INTRODUCTION

Intellectual Property Rights (IPR) have been defined as ideas, inventions, and creative expressions based on which there is a public willingness to bestow the status of property. IPR provides certain exclusive rights to the inventors or creators of that property, in order to enable them to reap commercial benefits from their creative efforts or reputation. There is an abundance of creative and innovative energies flowing in India. However, much of the Intellectual Property (IP) created remains unprotected.

Intellectual Property Rights has been high on the agenda of the policymakers these days and there has been a wide and ongoing debate on the nature and scope of these exclusive rights. The value of intellectual property does not lie merely in creation and development rather in its commercialization but also lie in the condition and circumstances of gaining protection and commercializing these rights.

India, revised its National IPR policy in the year 2016 with a mission statement to foster creativity and innovation in order to promote innovative entrepreneurship among youth. With the view to create awareness on the significance of IPR to the people from various sectors in the country, National Institute of Technology (NIT) Silchar is organizing a one week workshop on Intellectual Property Rights at the Institute campus.

The technical sessions will be led by the speakers having thorough knowledge in the domain of IP and who have been practicing in this field for many years. The expected participants of the program include Scientists, Research Scholars, Small & Medium Enterprise (SME) and Grass root innovators.

OBJECTIVE

The workshop aim to create IPR awareness among the Faculty members, Research scholars, Students and young intellectuals about the beneficial aspects of patenting their creative and novel ideas, innovations etc. Such awareness would in turn be highly essential for the promotion of creativity, research and technical advancements and their industrial applications. The workshop is intended to cover various components of IPR like Patents, Copyrights, Trademarks etc. and will focus on:

- Importance and scope of IPR in Academic Researches.
- Types of innovations and their patentability criteria.
- Procedure for Patent writing, filing and granting
- Commercialization of Intellectual Property Rights
- Infringement of IPR law provisions
- IP litigation and growing trends in India
- To analyze the impact of IPR on Technology and Innovation, R&D, particularly at industry level.

CONTENTS

- Concepts and relevance of IPR
- Components of IPR
- International agreements on IPR
- IPR & technological development
- IPR & Institution Industry Interaction
- Patentability Criteria with case studies
- Patent filing procedure and prior-art search
- Cases related to Patent Infringement
- IP commercialization and licensing

HIGHLIGHTS OF THE PROGRAMME

Technical sessions and discussions will be conducted by experienced faculties/scientists and IPR attorneys from Defence Research Development Organization (DRDO), Council of Scientific & Industrial Research (CSIR), Japan External Trade Organization (JETRO), IITs, NITs and Other reputed institutions.
